USE AS A GUIDE

IMPORT HEALTH REQUIREMENTS OF EL SALVADOR FOR ORNAMENTAL BIRDS EXPORTED FROM THE UNITED STATES

The animals must be accompanied by U.S Origin Health Certificate issued by a veterinarian authorized by the U.S. Department of Agriculture (USDA) and endorsed by a Veterinary Services veterinarian. The certificate shall contain a description of the birds and the name and address of the consignor and the consignee. Additional information shall include:

CERTIFICATION STATEMENTS

1. The birds are the offspring of domestically raised breeders.
2. Neither the breeding facility of origin of the birds nor any facility within a 30 Km radius of this facility has been under quarantine for any infectious or contagious disease during the past year prior to export.
3. No outbreaks of the following diseases have been reported in the breeding facility or facilities:
 - ▶ mycoplasmosis (M. gallisepticum)
 - ▶ Chlamydiosis
 - ▶ In the case of swans: Viral hepatitis of swans
 - ▶ In the case of canaries: Canary pox
4. The birds were isolated under official supervision for 21 days. (Note: can be under the supervision of a USDA-accredited veterinarian).
5. During isolation, the birds were treated for internal and external parasites with approved products (DESCRIBE TREATMENT); and the birds were treated for 5 days with chlortetracycline at the recommended dosage.
6. The birds will be transported in new containers and such containers have not been contaminated with infectious agents.
7. The birds will be transported from the facility of origin to the port of embarkation in cleaned and disinfected vehicles.

Additional requirements:

Any bedding and feed accompanying the birds will not be permitted to enter the country.
